

The Bellevue Hospital Employee Immunization Clinic

Open to all TBH employees, spouses & dependents
enrolled in The Bellevue Hospital's medical plan

- Immunization Clinics will be held in TBH's Specialty Clinic on the 4th Thursday of each month from 2 pm to 6 pm.

First Clinic to be held on January 26, 2023

- Your or your dependents' primary care physician will need to fax an **order** for the immunizations needed to: 419-484-5450.
- Orders must be faxed no later than the Friday prior to the clinic. This allows time to order and receive the vaccine.
- You need to call Centralized Scheduling at 419-483-4040, ext. 3067 to schedule the appointment and to provide insurance information. The physician's order must be received prior to scheduling.
- Bring with you any immunization records that need to be updated.
- When you arrive, you may go directly to the Specialty Clinic. Enter through the Cardiac Rehabilitation/Specialty Clinic entrance (east side of building).
- Preventive immunizations are covered at 100% with no deductible when the service is provided at TBH. See list on the back of this flyer.

Vaccines help your body create protective antibodies-proteins that help fight off infections.

By getting vaccinated, you can protect yourself and also *avoid* spreading preventable diseases to other people in your community.
